

**Project Design Phase-II**  
**Customer Journey Map**

Date	30 October 2022
Team ID	PNT2022TMID10695
Project Name	Fertilizer Recommendation System for Disease Prediction

STAGES	AWARENESS	INFORMATION GATHERING	DECISION MAKING	PESTICIDE SELECTION	BEFORE DETECTION	AFTER DETECTION
GOALS	Understand the type of leaf disease possibilities exist.	Learning	Setting criteria for Complete Healthy leaf knowledge about pesticides and achieve high yield production.		Leaf with high possibility of diseases.	A well-treated and healthy leaf without any disease.
ACTIONS	Sees a demo leaf with high infection which has to be treated.	Know about all the healthy and unhealthy leaf and talk to the specialist.	✓ Compares healthy leaf possibilities to the Knowledge unhealthy one and about which leaf makes a should treated decision with what kind of fertilizers	✓ Check leaf condition ✓ Check the weather condition	✓ Treats the leaf with suitable fertilizer as suggested	
	✓ Information provided at research	Verify the information provided at research	✓ Refer to the leaf family	✓ Check the soil condition	✓ Makes sure of the suitable soil and weather condition	
TOUCH POINTS	✓ Interactions with the specialists at the research center.		Information that can Checking pesticide be asked/known quality and cost . with others for good healthy leaf production.	Get to know the knowledge about leaf and its diseases.	Training all leave with good reference or by using good learning materials.	

FEELINGS	POSITIVE ↓ NEUTRAL ↓ NEGATIVE	Building excitement, cost of effort		Interested in yielding		Satisfied
			Hesitation, self-doubt	Confusion, Doubt in choice	Frustrated, worried	
PAIN POINTS	Information was not clear at first.	Difficult to understand the leaf disease Some information was confusing.	Lack of outside resources Doubt over the specialist information Lack of financing opportunities.	More cost consuming Takes lot of time for detection More confusion over choosing the pesticides.	Missed opportunity for initial pampering of leaf needs Difficult for a farmer to choose amount of soil.	Training was not clear Self-directed training/reference materials also was not clear.
KEY INSIGHTS	Awareness over the leaf diseases should be given to farmers.	Information needs to be easily shared outside, through demos and workshops.	Decision depends on specialists and farmers according to their wish for a healthy leaf.	Pesticides has to be selected according to requirements for leaf nourishment.	Leaf was unhealthy and disease infected.	An enhanced customer experiences Increased yield production Data enabled decision making using data analytics, sharing of best fertilizers.
